

UNITED STATES IS NOT TO HAVE VOICE AT GENOA

(Continued from First Page.)

the realization exists, it was said, that efforts to consummate the results of the Washington armament conference by the ratification of the various conference treaties are engaging the American government's attention primarily at present. It is the British belief that the other nations invited to attend the Genoa meeting will be present.

While it is known that Russia desired American representation, it is thought unlikely she will risk losing her long sought opportunity to re-enter the conference of the powers by declining to take part in the Genoa gathering.

Soviet Retreat Ended.
Moscow, March 9.—(By the Associated Press.)—"Soviet Russia's economic retreat has ended and will go no further in its concessions to capital," Nikolai Lenin told the congress of metal workers in a brief speech discussing the Genoa conference and Russia's international problems.

Simultaneously, Leonid Krassin, in an interview with the newspaper Ivestia, declared that Soviet Russia would not abandon her control of foreign trade.

The Soviet premier appeared refreshed after a sojourn in the country, from which he recently returned. He said he had been unable to do all his necessary work because of illness, but now he hoped he was sufficiently recovered to be able to go to Genoa "and tell Mr. Lloyd George it is no use to threaten Russia with things like probation."

He declared Russia had been tried and tested by more serious things during the last few years and knew that these were idle threats not to be carried out. He said he would be able to show the premiers at the Genoa conference, whose principal purpose was trade with Russia, many important trade contracts already signed in Russia's terms.

"Attempts to put us in the position of a conquered country are nonsensical," he said. "We, as merchants, know what we owe you and what you owe us, and also what should be your lawful profits."

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn instantly that corn stops hurting, then shortly you lift it right off with your fingers. True!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.—(Advertisement.)
